

Gasket Insertion Tool Technical Data Sheet

Description

An innovative, multi-use and cost effective gasket insertion tool designed with safety and efficiency in mind. Smarter, but simple in design and application.

The SWT gasket insertion tool's unique stainless steel clamp design is available for all gasket types and sizes, commonly but not limited to SBX, BX, R and IX compact gaskets.

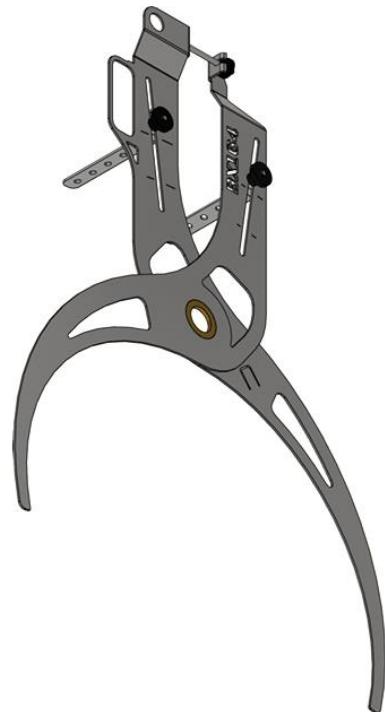

Application

The pre-set elevation arms position the gasket in the flange recess precisely, allowing confident mating of the flanges, even in poor visibility. The simple clamp mechanism allows ease of removal for re-use on multiple spool installations.

Material Specification

The SWT gasket insertion tool is designed and manufactured in the UK from SAE 316 marine grade stainless steel.

Main body / Clamp arms	SAE 316 marine grade stainless steel
Clamp Hinge	SAE 316 marine grade stainless steel
Screws and nuts	SAE 316 marine grade stainless steel
Latch mechanism	Rubber composite

SBX/BX -169 Clamp Dimensions (mm)

Length	Width	Breadth	Weight
808.58	612.13	02.00	50g

As the company's products are used in multiple applications and as the company has no control over the method of their use Saltwater Technologies assumes no liability for any damages which may result from the use of our products. User assumes all risks.
